

ABBASOFT solutions for Suppliers, provide comprehensive systems for Promotional Products companies. Built on SAP Business One, ABBASOFT solutions are integrated, affordable business management solutions that can help streamline your project work flow and improve your productivity. ABBASOFT solutions support all of your critical business functions in a near-paperless environment allowing you to stay on top of your business while growing your profitability.

The Work Flow extension can provide detailed tracking of sales orders every step of the way. Work Flow can vary by order type and production location and allows for up-to-date order status on your website for your Distributors.

The screenshot shows the SAP Location Inquiry window for Sales Order Number 2401. The interface includes filter options for SO Line, WCTR, and Display Only Open. The main table displays 13 work center steps with columns for Line #, Part Nbr, QORD, QSHP, Work Center Desc., Date In, Date Out, Time Out, Closed, Curr, Empl, Comments, and Add Alerts. Callout boxes highlight specific features: 'Work Flows can vary by order type' points to the filter settings; 'Track date in and out of departments' points to the Date In and Date Out columns; 'Update location with current comments' points to the Comments column; 'Displays detailed project movement' points to the Work Center Desc. column; 'Shows current location' points to the Empl column; and 'Alerts to multiple people' points to the Add Alerts column.

#	Line #	Part Nbr	QORD	QSHP	Work Center Desc.	Date In	Date Out	Time Out	Closed	Curr	Empl	Comments	Add Alerts
1	1	A00001	1000	0	Order Entry	01/03/08	01/03/08	925	Y	N	Doris

- Insert and track re-work steps.
- Provide automatic alerts for jobs that stay too long in a department.
- Report work load by department by employee.
- Credit logic can stop Work Flow at critical departments, but allows pre-production work to continue.
