

PROMOTIONAL PRODUCT EXTENSIONS FOR SAP BUSINESS ONE

Overview

Paper based processors are a thing of the past when using SAP Business One with the ABBASOFT extensions. No more losing an order or out-of-file conditions to interfere with the production of getting the job done. Designed specifically for promotion products industry and built on SAP Business One, this integrated and affordable, business management solution can help streamline your project workflow and improve your productivity whether you are a Supplier or a Distributor.

Below is a summary list of the extensions which can be purchased separately or bundled with SAP Business One. Even though your company is involved in the promotional products industry you may or may not need some extensions. The important point here is, with some or all of the extensions listed below, your company should be able to install SAP Business One with minimal changes, if any.
